PROFILE SUMMARY

A motivated and detail-oriented Computer Science Engineering (Data Science) student seeking an opportunity to apply backend development skills using the Spring Framework in a practical setting. Eager to leverage a strong foundation in Java, Spring Boot, Spring Security, JPA, Hibernate, REST APIs, and SQL to build scalable and efficient backend systems.

EDUCATION

Institution	Qualification	Duration	Score	Location
R.C. Patel Institute of Technology, Shirpur	B.Tech - Computer Science Engineering (Data Science)	2023 - 2027	7.5 CGPA	Shirpur, Maharashtra
Balmohan College, Chopda	HSC	2021 - 2023	83.00%	Chopda, Maharashtra
Pankaj Vidyalaya, Chopda	SSC	2020 - 2021	80.80%	Chopda, Maharashtra

TECHNICAL SKILLS

Languages: Java, SQL, HTML, CSS, JavaScript
Backend: Spring Boot, Spring Security, JPA, Hibernate, REST APIs
Other Frameworks: Django

PROJECTS

Airbnb Clone - Property Rental Backend (Spring Boot)

A backend system for a property rental platform inspired by Airbnb, built with Java, Spring Boot, Spring Security, JPA and Hibernate on an SQL database. Provides REST APIs for user registration and login, property listing management, search, and booking, with secured, role-based access to endpoints.

Job Recommendation System

An intelligent web-based platform designed to match job seekers with suitable employment opportunities using data-driven algorithms. Developed using HTML, JavaScript, and Django, the system analyzes user profiles, skills, and preferences to recommend relevant job listings, enhancing job search efficiency and personalization.

E-Commerce Platform

A scalable and interactive web application developed using HTML, JavaScript, and Django, designed to facilitate secure online shopping experiences. The system integrates product management, user authentication, and payment modules to deliver a responsive and efficient e-commerce solution that enhances user engagement and business growth.

Review Classification System (NLP Project)

An intelligent NLP-based system developed to classify user reviews and perform sentiment analysis. It applies text preprocessing, feature extraction, and machine learning techniques on real-world data. The system helps identify positive, negative, or neutral sentiments, improving decision-making and user insights.

CERTIFICATIONS & ACHIEVEMENTS

- R3Sys Workshop
- Data Structures & Algorithms - CodeChef
